Have you ever felt the need to "recall" information that you have sent to other people

Do you know what happens to your documents after distribution?

What happens if an employee with access to confidential information leaves?

If any of these questions plague you, we have the answer ...

Seclore FileSecure is an information rights management system which mitigates risks arising out of information breaches and regulatory non – compliance whilst enhancing collaboration

With FileSecure you can

✓ Monitor and Control WHO (people, groups, ...) is accessing your documents after you have sent them

✓ Monitor and Control WHAT (view, edit, copy, forward, ...) is happening to your documents

✓ Monitor and Control WHEN (dates, timespans, ...) are your documents accessed

✓ Monitor and Control WHERE (within the office, at home, ...) are your documents accessed

✓ Send self-destructing documents to colleagues & partners

✓ Change document rights after you have sent them via email, CD, ...

FileSecure delivers value by

✓ Reducing risks of information breaches

✓ Providing security without hindering collaboration

✓ Working with your existing infrastructure

✓ Being fast to deploy and easy to use

✓ Supporting all major document formats (MS Office, PDF, Text, Images, AutoCAD, ...)

✓ Making enterprises compliance to regulatory frameworks e.g. ISO,

A product incubated and promoted by IIT Bombay and used by the likes of HDFC Bank, ICICI Bank, Reliance Capital, L&T, UHDE India and many more.
